

College Students Are Facing Growing Financial Challenges...

With challenges such as credit card debt and even gambling, **Crown's Biblical Financial Study – Collegiate Edition** is an excellent study to teach God's perspective of money at this critical time in their lives.

The study emphasizes how money affects a believer's personal relationship with God. Students will learn what Scripture teaches about managing all of their possessions—not just money. Through the small group experience, participants will develop life-long relationships with other Christians.

Surveys show that this study has a dynamic, life-changing impact on debt reduction, contentment, giving, and learning how to manage one's money. Students will memorize important verses from God's Word. Through practical exercises and accountability, participants will learn a biblical approach to creating a budget, establishing a debt reduction plan, and managing their resources.
